

1. QUALITY AND ENVIRONMENTAL POLICY

The continuous pursuit of the company is its commitment to conduct actions that ensure top quality of the products and attention to minimize environmental impact, which also

Our Vision

- The best brand.
- The best product.
- The best business partner.
- The best employer.
- The most admired and renowned company among global producers of window and door woodwork.
- Achieving perfection in production processes of our goods.
- Sustainable management of natural resources and high percentage of recycling.

allows to build recognition among new Clients, as well as enhance the company reputation among existing customers, both in Poland and abroad. Our economic activity guarantees respect for the natural environment and the decisions we take affect it as little as possible. We are aware of the fact that the future of our company depends on our ability to fulfill the needs, expectations and requirements of Clients as well as the demands from other interested parties, while providing utmost care of the above mentioned environment. We believe that we are able to respond to market and society needs only through bilateral communication. Our company micro-world mingles with the external world. Therefore, sustainable development constitutes the basis for our operations. We aim at creating conditions in the company so that it will function and develop in a friendly and safe manner for everybody. We want to be a friendly drive for the future so that the value we create now will become an element of a stable foundation in the years to come.

Our Values

- Our people are our most inherent advantage.
- We understand and respect our clients. We provide our clients with top-class service.
- We value innovation and professionalism. -We have only one reputation.

We commit ourselves to:

- act in line with all binding legal acts and other requirements regarding our operations, i.a. NFRC certification scheme, Keystone Fenestration certification scheme Keystone IG certification scheme,
- undertake pro-quality and pro-ecology tasks, tapping into cutting-edge techniques and technology in design and production,
- prevent environmental pollution and reduce its the impact,
- compliance in quality, accident prevention among staff and subcontractors, and pro-ecological waste management,
- continuous upskilling, enhancing knowledge and rising awareness of our staff in the broad scope of quality, environment and health and safety,
- creating atmosphere of mutual trust and respect towards our clients, staff as well as suppliers,
- analysis of effective functioning and efficiency of the executed processes in the area of quality, and identification, assessment and elimination of environmental risk,
- ensuring the necessary information, resources and means to fulfill the established objectives and obligations, as well as the undertaken improvement measures.

PRESIDENT
Leszek Gierszewski
